

CS 1632 Software Quality Assurance

Deliverable 3

Member 1 Name: Mark Kraus

Member 2 Name: Henry Uz

Team Name: The Legion

1. Introduction

Write your retrospective here. Please describe the division of work between group members. Also, please describe any difficulties that you faced while using Selenium

The Selenium testing was divided as such:

Mark:

Tests 8-11

JUnit Debugging

GitHub Issues

Submissions

Henry:

Tests 1-7

Defect 1-3

Report Template

We had run into issues with TERST-1-LINKS and tried to use the href attribute. This was because we had not used it before and had to do a little research into what it was and how it worked. The rest of the tests were smooth sailing, and we felt very comfortable with completing the rest of the tests. We encountered two small errors when we exported the Selenium Web Tests to JUnit tests. We were receiving the full xpath of elements when we were expecting the relative paths, and this failed two of the tests, but we were able to quickly adjust the tests and had no issues after that. In short, only two JUnit tests were incorrect after exporting, which saved us some time with having to debug.

.

2. Link to GitHub issues

Please paste here the URL to your GitHub classroom repository issues page where I can find the three closed issues.
